

# Fastlane Optical Turnstiles

## Concept

Fastlane is a state of the art „optical“ turnstile, which replaces the need for an obtrusive physical/mechanical barrier by utilising active infra-red beams to create an invisible electronic field between two pedestals. Fastlane automatically monitors the passage of every individual entering and leaving the facility, only alerting security staff to the presence of unauthorised entrants.

Clients and employees alike pass through Fastlanes channels with speed and safety while unauthorised entry attempts are identified.

## Secure

Fastlane offers a similar level of security as a ½ height turnstile and is designed to alert security staff to unauthorised entry attempts by triggering an audible alarm and controlling other security measures such as CCTV systems, lighting and locking doors. Fastlane activates an alarm in the event of an illegal action. If an unauthorised person attempts to enter Fastlane is designed to detect tailgating, collusion, non-entry and obstruction. Fastlane can also assist the access control system to maintain anti pass-back integrity.

## Disabled Access

Fastlanes combination of audible and visual sounders coupled with „wheelchair width“ lane options make Fastlane compliant with the UK Disabilities and Discrimination Act (DDA) and most other international disabilities regulations without the need for a separate passgate.

## Aesthetic

Fastlanes discreet presence offers unrivalled benefits in terms of aesthetics and design flexibility. A wide range of enclosures are available and the pedestals can be custom designed to complement the most diverse design concepts, providing a welcoming and non-confrontational entrance to staff and clients alike, ensuring the ultimate in architectural flexibility and security. This is particularly relevant in corporate offices, listed buildings, banks and airports where design is a high priority.

## The Centaman advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering entrance control solutions*

## Key Advantages

**Advantages More Secure** – Unsurpassed tailgate detection; tailgaters are detected following as close as 5 mm behind authorised users.

**Fastest Throughput** – Means a greater return on investment. 1 person per second often means fewer lanes are required, and less wasted time in queues leads to greater user acceptance.

## Wide Range of Designs

**Unsurpassed Accuracy** – Virtually eliminates false alarms. The intelligence of Fastlane enables the system to differentiate between body mass and small objects such as umbrellas etc. This increases user and guard acceptance, avoiding “tune-out” from excessive false alarms.

**Most Streamlined** – Fastlane is an architect-inspired solution; the small enclosures take up less space than other systems. The units for wider disabled lanes are the same width as all other pedestals.

**Easiest Installation and Ongoing Maintenance** – Industry proven technology and onboard diagnostics to ensure maximum system up-time.

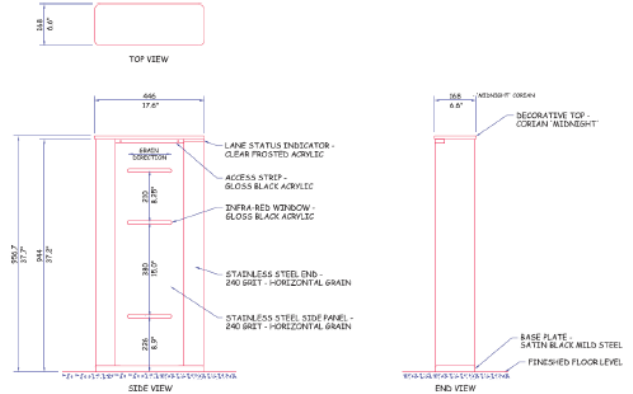

**Safety** – No physical barrier to cause injury or to impede emergency egress.

## Pedestal Designs

**Fastlane ClearStyle 200**

**Fastlane Compact**

**Fastlane ClearStyle 400**

**Fastlane Elliptical**

### About CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.

With over 14 years experience successfully delivering entrance control solution and over 40 staff and operates 5 offices throughout Australia and New Zealand CENTAMAN is the ideal choice of partner for all your entrance control requirements. CENTAMAN offers supply only to full turnkey installation projects and has a variety of flexible support and maintenance options to ensure the ongoing reliable operation of your entrance control solution all backed by a Sydney based 24/7 support telephone support help-line.
