

Centurion EntryGate

Concept

The Centurion EntryGate is an elegant and subtle entrance gate that is ideal when security and design are of equal importance. The EntryGate provides a highly effective means of controlling access in and out of any facility. The Centurion EntryGate combines a highly reliable mechanism with a choice of barrier designs making it ideal for applications such as reception areas in office buildings and leisure clubs as well as museum, transport and stadia applications.

Centurion EntryGate

The Centurion EntryGate is designed to be installed both indoors and outdoors without protective cover.

Secure

The physical barrier ensures one person per authorisation and the low barrier height deters any climb under attempts.

Aesthetic

The enclosure is available in a choice of brushed and polished stainless steel or brass. The barriers can either be made of toughened safety glass for a discrete finish ideal for indoor applications or stainless steel tubing for a robust waterproof finish ideal for outdoor or wet area applications.

Reliable

At the heart of the Centurion EntryGate is a highly reliable motor with an MTBF of 3,000,000 cycles. The drive motor is a sealed unit making it a virtually maintenance free design.

Remote Control

The EntryGate can be supplied with a desk mounted console or PC software to provide the reception team with easy control of the turnstiles functionality to facilitate visitor entry, simplify alarm monitoring and change operational modes.

In addition the turnstiles can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and trouble shooting saving on expensive site visits.

The CENTAMAN advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering*

Key Benefits

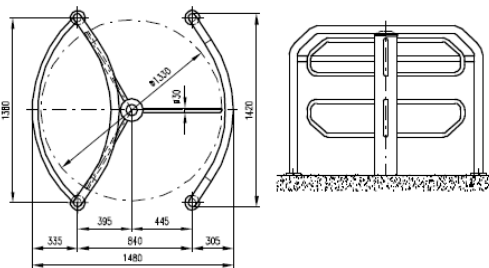

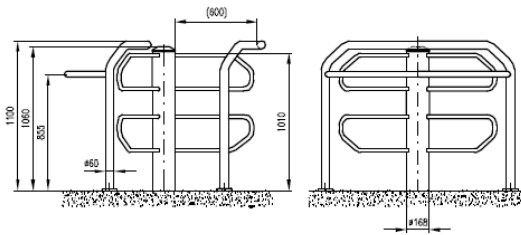

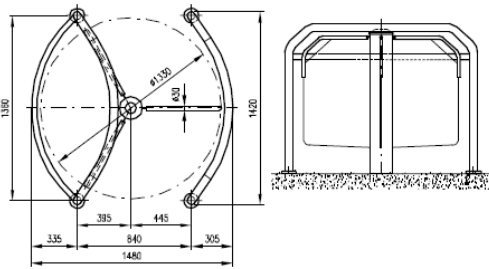

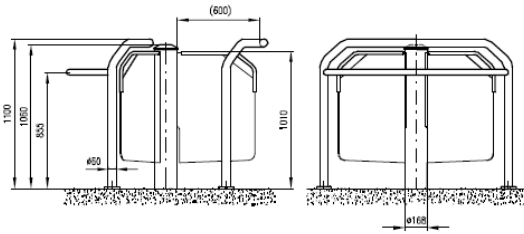

- **European Styling**
- **Deters Climb Under Attempts**
- **Motorised for Ease of Use**
