

Centurion CLEAR

Concept

The Centurion CLEAR is a full-height motorised turnstile which combines high performance and aesthetics. The combination of a stainless steel frame with glass panels provides a high security solution with an open, friendly look. Quality, reliability and easy operation are the hallmarks of the Centurion CLEAR making it ideal for high security applications where the full automatic identification of people is required.

Centurion CLEAR

Centurion CLEAR is a bi-directional turnstile managed by state of the art control electronics. The 120° openings ensure comfortable, easy and safe access for one person. Integrated sensor scans the 'no go' zone and if any presence is detected in this zone an external alarm is triggered and there is the additional option to automatically reverse the turnstile's motor to push the unauthorized person back.

Authorised Passage

Illegal Passage

The Centurion CLEARs' motor drive unit provides smooth silent operation coupled with reliable and maintenance-free running, in addition it

- Automatically adapts the rotation speed to the users.
- Provides a high level of safety - in the event the turnstile senses an obstruction it will stop moving.
- Is available in a Fail Safe and Fail Secure versions

PC Based Monitoring Software

The easy to use TMON Software gives the reception team or security guard total control the turnstiles functionality and operating modes whilst also providing population counts from the turnstiles. Change operational modes on the fly, enable visitor entry, simplified alarm monitoring, analyse lane usage and change turnstile directions to calm traffic surges all at the click of a mouse.

Remote Turnstile Maintenance

The main CPU of the EasyGate can now be accessed remotely by a PC allowing engineers to dial in and undertake remote maintenance, service, configuration & trouble shooting - In 80% of problems this can remove the need for a site visit, and in the event a visit is required the engineer will normally already have a good idea of what the issue is which means less time on site and a reduction in the likelihood of a return trip.

The CENTAMAN advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering entrance control solutions*

Key Benefits

High Security

- Prevents climb over attempts
- Deters Tailgating

High End Aesthetics

- Architect Inspired
- Transparent Design
- Stainless steel and glass design

Reliable

- MTBF of 3,000,000 operations
- 24 month warranty

Advanced Technology

- Remote Turnstile Diagnostics
- Bespoke PC monitoring solution

More Secure

- Monitors the 'No Go' Zone
- 2 Security Levels

Applications

- Corporate Offices, Government, Airports, Leisure Clubs, VIP Areas

**Remote Diagnostics
Option**

Specification

Dimensions

Standard: 1610(L) x 1610(W) x 2400(H)
Lane width 705mm

Electrical

Power Supply : 12 V DC
Current : Standby 0.4 A
Consumption : Operational 6 A

Operating Temp : -10°C to 50°C (with heater)

ACCESSORIES

Holders for accessories:

Holders for placing of identification readers or other accessories (for example: LED information panel).

Lighting:

Lighting of turnstile interior - standard.

Anchoring frame:

Steely frame to fix the turnstile, for example through the stone block paving.

LED information panel:

Lane status and user instruction

Touch control panel

- turnstile manual control
- turnstile manual unblocking

Battery Back-up:

During a power failure the accumulator ensures its continuous operation for a period of minimally 6 hours.

Counter:

Turnstile can be equipped with the passage counter

Materials

Glass : 8 mm Tempered Safety
Frame : Stainless Steel
Push Bar : Stainless Steel

For Remote Turnstile Maintenance access to the sites network is required and the service is subject to a support agreement

NB: Specifications subject to change without prior notice

About CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.
