

# Remote Turnstile Control with Touch Panel

## Concept

The Touch Panel is a desk mounted unit which is designed to sit at reception and provide the reception team with remote control over the turnstiles functionality. The unit consists of touch sensitive buttons, an on board sounder and LED's for reporting back various conditions.

### The unit is designed to allow:

- Entrance/Exit for 1 visitor at a time
- Entrance/Exit for a large group of visitors
- Disabling the turnstile
- Enabling "emergency" mode to enable free exit (subject to configuration)
- Reporting back of any turnstile malfunctions
- Touch Panel can be configured for 3 turnstiles with "emergency" override or 4 turnstiles

### The CENTAMAN advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering entrance control solutions*
- *Part of the Jonas Group—a top 100 software company*

### Key Benefits

#### Touch Panel can control

- Visitor Entry
- Fire Alarm Functionality
- Lock / Unlock Turnstiles
- Turnstile Functionality
- Fault Reporting

The Touch Panel works with most of our Centurion Turnstiles. Please check with CENTAMAN Entrance Control for compatibility

# Local Turnstile Monitoring *with TMON*

## Concept

The easy to use TMON software gives reception team or security guard total control the turnstiles functionality and operating modes whilst also providing population counts from the turnstiles.

**Monitor turnstiles locally or remotely.** Monitor all your turnstiles at once; each lane is visible on the screen. Each turnstile icon shows its state by colour. Alarms flash red to grab attention. Watch your turnstile activity from anywhere in the building – the guard desk or security office – as if you were there.

**Analyse traffic.** Maintain a count of the number of people using each lane—both in and out.

**Welcome visitors.** Enable the reception team to open the turnstiles for visitors to enter your secure premise without an access card and without generating (false) alarms. Count visitors as they enter your site. Eliminate bulky guard shunt switches on the security desk.

**Program the turnstiles to control & calm traffic.** Change lane state (open/card access/closed) on the fly. Have free egress during the day and require people to card out at night. Close some entrances after-hours. In peak periods, set some lanes for entry only and others for exit only to smooth traffic flow.
