

Entrance Control

SWINGGATE G

ABOUT

The Centurion SwingGate is a cost effective and user friendly passgate allowing the passageway of disabled users, people requiring assistance, prams, deliveries and visitors. This motorised flexible gate can either be used as a single or double unit to provide opening of up to 1.8 metres and the toughened safety glass panel barriers can come in 1020mm to 1800mm high versions.

The SwingGate can be used for side access gates, dedicated exit lanes, stairway security or for dividing up internal project areas. The SwingGate can be controlled by either a simple push button override, IR sensors or it can be integrated with virtually any access or membership system.

Once activated the gate opens and then closes automatically after a programmed period of time or it can be held open for extended periods.

KEY FEATURES

- Toughened safety glass
- Up to 1800mm high barrier
- Motorised
- Single or tandem pedestal use
- Integrates with fire alarm systems
