

Entrance Control

EASYGATE IM

SLEEK. STYLISH. CUSTOMISABLE.

ABOUT EASYGATE IM

The Centurion EasyGate IM is our state-of-the-art swing barrier speedgate designed to ensure only one person gains access for each authorised card presented. The EasyGate uses glass barriers that swing away from an authorised user in a friendly door like motion in conjunction with optical tailgate detection technology to provide a high throughput / high security gate. The swing barrier design ensures the same narrow pedestal can be used for both standard width and DDA lanes.

ARCHITECTURAL FLEXIBILITY

The EasyGate IM is designed to be supplied clad in Corian, marble, granite, wood or similar materials. The metal side panels can be finished in brushed, polished or different coloured stainless steel.

KEY FEATURES

- Architecturally inspired design
- Range of cladding options
- Swing Barrier Operation
- Whisper Quiet Motor
- DDA Compliant

OPERATION

The barriers work in a normally closed mode and quickly swing down the pedestal length after a valid card has been presented giving the authorised user a clear lane to pass through. The barriers quickly close behind the authorised person, thereby deterring any unauthorised entry or tailgating.

The EasyGate IM features our state-of-the-art Magnet Drive Motor that provides faster and quieter operation. The glass barrier for the EasyGate IM can be up to 1800mm tall to prevent climb over attempts and making it suitable for unmanned applications.

SAFETY

Safety beams monitor the area near the barriers and are designed to prevent the barriers from closing/ opening on an obstruction. The EasyGate has 5 safety and security settings that define the size of the safety zone in the gate's operation. This allows us to tailor its security level to suit your site. Additionally, the barriers feature a torque sensor so they can detect resistance when closing. When integrated with the fire alarm system and upon a fire alarm, the barriers automatically open to allow for free emergency egress. The barriers can also open in the same manner in the event of a power outage.

RELIABILITY

With a MTBF of 5,000,000 and industry leading 36 months warranty the EasyGate IM is designed to provide years of trouble-free operation. In addition, the turnstiles can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and troubleshooting saving on expensive site visits.

ADD ON'S

The EasyGate IM can be supplied with a number of add-ons such as customised coloured glass tops, anti-climb pressure sensors, expanded alarm outputs and a WAV player to play recorded messages in different scenarios ranging from alarm alerts to invalid card warnings.

ABOUT CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.

With over 14 years' experience CENTAMAN is the ideal choice of partner for all your entrance control requirements. CENTAMAN offers supply only to full turnkey installation projects and has a variety of flexible support and maintenance options to ensure the ongoing reliable operation of your entrance control solution all backed by a Sydney based 24/7 telephone support helpline.

KEY BENEFITS

- **More Secure**
 - A range of barrier height options 995mm / 1200mm / 1800mm
 - Fast acting barriers close the lane quickly behind authorised users to deter tailgating
 - IR sensors detect tailgating and unauthorised entry
- **Reliability**
 - MTBF of 5,000,000 operations
 - 36 Month Warranty
- **Advanced Technology**
 - Remote Turnstile Management
 - Bespoke PC monitoring solution
 - 5 Security Settings
 - Faster Throughput
 - Fast acting barriers
 - Quiet, smooth mechanism
- **Safe**
 - IR beams check the area around the barrier so it can safely close
 - Torque detection enables the barriers to stop if an obstruction is detected
- **High End Aesthetics**
 - Easily customisable decorative tops to blend in with the building design
 - European Designed & Manufactured
- **Applications**
 - Corporate Offices, Government, Sports Stadia, Leisure Clubs, Manufacturing Plants.
