

Entrance Control

EASYGATE SPT

SECURE. ELEGENT. SPACE-SAVING.

ABOUT EASYGATE SPT

The Centurion EasyGate SPT is our state-of-the-art swing barrier speedgate designed to ensure only one person gains access for each authorised card presented. The EasyGate uses glass barriers that swing away from an authorised user in a friendly door like motion in conjunction with optical tailgate detection technology to provide a high throughput / high security gate. The swing barrier design ensure the same narrow pedestal can be used for both standard width and DDA lanes.

KEY FEATURES

- Swing Barrier Operation
- Narrow Pedestal
- Whisper Quiet Motor
- Barrier height up to 1800mm
- DDA Compliant

OPERATION

The barriers work in a normally closed mode and quickly swing down the pedestal length after a valid card has been presented giving the authorised user a clear lane to pass through. The barriers quickly close behind the authorised person, thereby deterring any unauthorised entry or tailgating.

The EasyGate SPT features our state-of-the-art Magnet Drive Motor that provides faster and quieter operation.

The glass barrier for the EasyGate SPT can be up to 1800mm tall to prevent climb over attempts and making it suitable for unmanned applications.

SAFETY

Safety beams monitor the area near the barriers and are designed to prevent the barriers from closing/ opening on an obstruction. The EasyGate has 5 safety and security settings that define the size of the safety zone in the gate's operation. This allows us to tailor its security level to suit your site. Additionally, the barriers feature a torque sensor so they can detect resistance when closing.

When integrated with the fire alarm system and upon a fire alarm, the barriers automatically open to allow for free emergency egress. The barriers can also open in the same manner in the event of a power outage.

RELIABLE

With a MTBF of 5,000,000 and industry leading 36 months warranty the EasyGate SPT is designed to provide years of trouble-free operation. In addition, the turnstiles can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and troubleshooting saving on expensive site visits.

ADD ON'S

The EasyGate SPT can be supplied with a number of add-ons such as customised coloured glass tops, anti-climb pressure sensors, expanded alarm outputs and a WAV player to play recorded messages in different scenarios ranging from alarm alerts to invalid card warnings.

KEY BENEFITS

- **Fast acting barriers**
 - Patented MDD system is our fastest yet
- **High-end aesthetics**
 - European architectural design
 - Durable, stainless steel pedestal
 - Same slim pedestal design for wheelchair lanes
- **Reliability**
 - MTBF of 5,000,000 operations
 - 36 month warranty
 - Manufactured in Europe to ISO9001
- **Heightened security**
 - Fast acting barriers close behind authorised users to deter tailgating
 - IR sensors detect tailgating and unauthorised entry
- **User friendly**
 - No contact barriers provide easy passage, even with luggage
 - Fast-acting barriers open away from users
- **Versatility**
 - Designed for use in fast throughput environments including office lobby's and public transportation.

ABOUT CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.

With over 14 years experience CENTAMAN is the ideal choice of partner for all your entrance control requirements. CENTAMAN offers supply only to full turnkey installation projects and has a variety of flexible support and maintenance options to ensure the ongoing reliable operation of your entrance control solution all backed by a Sydney based 24/7 telephone support helpline.
