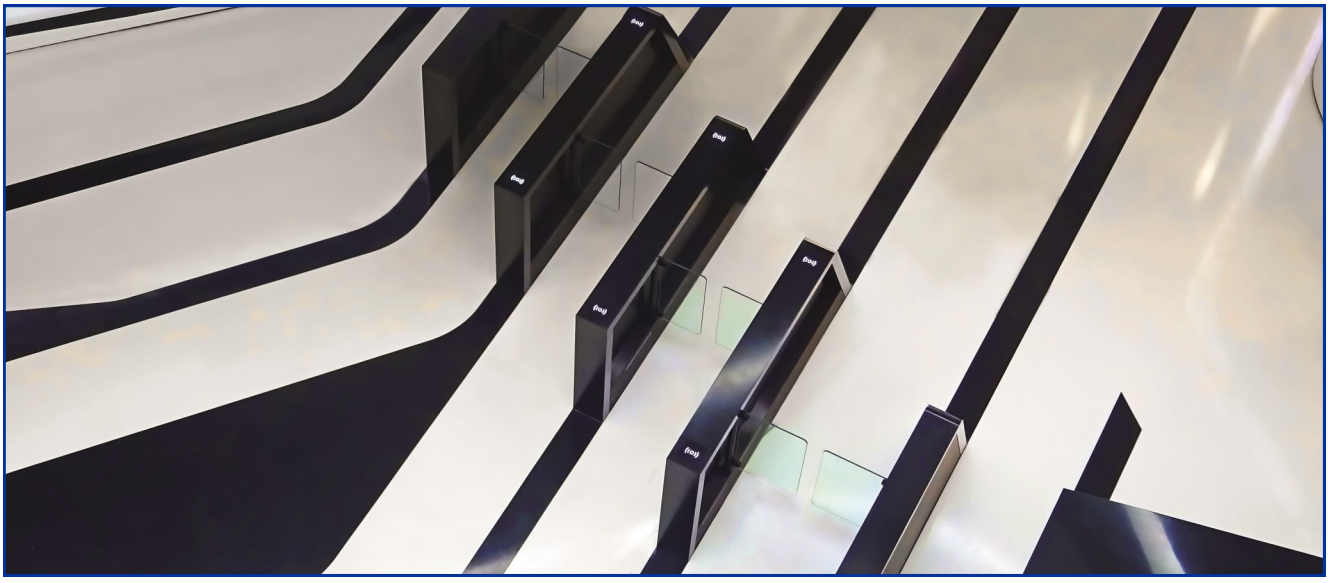
a Case Study

Entrance Control



"The ability of our designers to match the architect's vison gave EasyGate a clear advantage in this project. Security should no longer seen as an obstacle. EasyGates flexibility in design makes it an ideal solution for the reception area of a building like this." commented Michael Bystram, Entrance Control Manager at Centaman.

The Site

Dominion Tower, Zaha Hadid has created a seven storey office block in Moscow for the city's growing IT and creative sectors, with off-set floor plates and a dramatic black and white atrium.

The Challenge

Part of the requirement of the building was to create a secure perimeter at the reception point to ensure access is limited to the staff who work in the building and their guests. Clearly with such a unique design a unique entrance control solution was required. As such 4 lanes of EasyGate SG where custom design to match the dramatic interior.

The Solution

As such 4 lanes of EasyGate SG where custom design to match the dramatic interior. The EasyGate pedestals where designed to be installed in a ''step configuration'' and the pedestal housing was customized to match the buildings monochrome appearance. The pedestals where constructed out of black stainless steel and black Corian. The ends of the pedestals where designed to match the flow of the building by appearing to blend in to the floor design.

Centurion EasyGate SG uses waist height glass barriers in conjunction with state-of-the-art optical technology to provide a high throughput security gate. The bi-directional glass barriers are designed to work in a 'normally closed' mode and open after a valid card has been presented to allow the authorised user to pass. The barriers are designed to close quickly behind the authorised person to deter tailgaters whilst the IR sensors monitor the lane to detect unauthorised entry and ensure the safety of users. The 'swing barrier' design of the EasyGate SG allows the same slim pedestal to be used for both standard width and wheelchair width lanes alike making it ideal for installation in areas with space constraints.

About CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.
