

## OUR SERVICES

Centaman Entrance Control is here to help with every step of your project. Our dedicated team of turnstile design experts will work with you from specification right through to installation and project completion to ensure the final results meet your needs.

In addition to our product customisation and installation service, we can:

- Provide you with data sheets, technical specifications and DWG files
- Mock up layout designs, AutoCAD footprints and AutoCAD visualisations
- Supply Revit files for each turnstile
- Deliver 3D renderings
- Produce CPD presentations
- Analyse traffic flow/throughput formulas
- Create conduit and cabling drawings
- Provide a custom turnstile design service' to bottom of list.

Our stylish turnstiles help any reception area work seamlessly, while ensuring a high level of security to protect your employees and assets.
