

Centurion Full Height XGL

Concept

The Centurion XGL is a full-height motorised turnstile which combines high security and aesthetics. Quality, reliability and easy operation are the hallmarks of the Centurion XGL making it ideal for high security applications where the full automatic identification of people is required.

Aesthetic

The Centurion XGL is designed for indoor applications in offices where the first impression is a key criteria. The combination of a stainless steel and glass panels provides a high security solution with an open, friendly look.

Intelli-Motion Technology

The Centurion XGL features Intelli-Motion speed control which is designed to improve the user experience by providing a consistently smooth, controlled, rotation. The turnstiles microprocessor custom-adjusts the rotation speed of the turnstile to the user. If the user pushes gently, the turnstile turns slowly. If the user pushes hard, the turnstiles' speed automatically increases. This kind of consistently controlled rotation is safer for the user and substantially reduces turnstile wear and tear in heavy use installations for lower maintenance requirement and a longer life span. Intelli-Motion solves the issue where certain turnstiles are harder to push than others and where recoil from the turnstile arms can sometimes be a problem.

Tailored to Suit

The Centurion XGL can have the majority of its settings like torque, speed, timeout period, sensitivity, fire alarm integration, brake performance and card buffering adjusted on site, or remotely to ensure its performance best matches the site requirements.

Reliable

The Centurion XGL comes with a sealed motorised drive which provides greater reliability, lower maintenance and faster, easier throughput than traditional mechanical units.

Flexible

The XGL is available with a matching motorised side gate to provide opening of up to 1500 mm for wheelchair access, deliveries and any other wide lane access requirements.

Remote Control

The turnstile can be supplied with a desk mounted console or PC software to provide the reception team with easy control of the turnstiles functionality to facilitate visitor entry, simplify alarm monitoring and change operational modes. In addition the turnstiles can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and trouble shooting saving on expensive site visits.

The Centaman advantage...

- *Technically superior products*
- *Sydney based 24/7 support helpline*
- *Local offices for a faster response*
- *Flexible support packages*
- *Supply only to turnkey project delivery options*
- *14 Years experience in successfully delivering entrance control solutions*

Key Benefits

High Security

- Prevents Climb Over Attempts
- Deters Tailgating
- Suitable for Unmanned Reception Areas

High End Aesthetics

- Architect Inspired
- 'Open' Design
- Stainless Steel and Glass Materials
- European Styling and Manufacture

Reliable

- Intelli-Motion Technology
- MTBF of 3,000,000 operations
- 24 month warranty
- Sealed Motor for "Maintenance Free" Operation

Advanced Technology

- Remote Turnstile Diagnostics
- Bespoke PC monitoring solution

Applications

- Corporate Offices, Government, Airports, Research Labs

Specification

Dimensions

Standard: 1365mm(L) x 1540mm(W) x 2460mm(H)
Lane width 550mm

Power Supply Input :230 volts
Control Electronics : 12 V DC
Current : Standby 0.1 A
Consumption : Operational 3 A
Operating Temp : -30°C to 50°C
Humidity : 80%
Motor : 12V DC

Operation Mode : Fail Safe
(Fail Secure Option)

Control : Card In / Card Out
Card In / No Exit
Option Card In / Free Exit
Locked
Free Wheel

Operating Parameters

- Operating temperature: -30°C to +50°C
- Humidity: maximum 80%
- MCBF: 3.000.000 cycles (Mean cycle before failure)

Options

Motorised Side Gate for DDA compliance
Fail Secure Motor
LED Traffic Lights
Card Reader Poles
Touch Panel Remote Control

For Remote Turnstile Maintenance access to the sites network is required and the service is subject to a support agreement

NB: Specifications subject to change without prior notice

About CENTAMAN

CENTAMAN Systems Pty is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the CENTAMAN portfolio of entrance control solutions.

With over 14 years experience successfully delivering entrance control solution and over 40 staff and operates 5 offices throughout Australia and New Zealand CENTAMAN is the ideal choice of partner for all your entrance control requirements. CENTAMAN offers supply only to full turnkey installation projects and has a variety of flexible support and maintenance options to ensure the ongoing reliable operation of your entrance control solution all backed by a Sydney based 24/7 support telephone support help-line.
