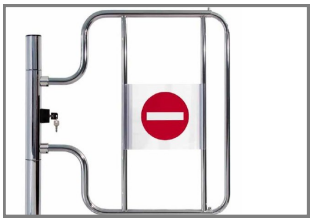
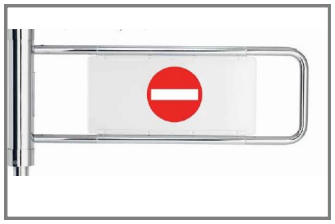
Entrance Control

Centurion PathMinder

Concept

Our PathMinder range offer an extremely effective yet economical directional control solution. As reliable as it is practical, our mechanical gates are designed to be used in areas to positively indicate the entrance/exit traffic flow and particularly suited where low to medium security environments.
The gates can be used to politely control customers movement to the right exit via a cash desk or staff member to verify the required transaction has taken place.





PathMinder Turnstile

The mechanical turnstile is the ideal solution for controlling foot flow on a limited budget. This turnstile is compact yet very effective -allowing throughput to be controlled with only minimum supervision. It is a proven design and is constructed from the highest quality materials to give total reliability.

The added benefit to this particular unit is that the turnstile has a built in safety feature. When the turnstile is lifted up, the whole unit can be moved to give a clear wide exit in emergencies.

Features

- The mechanical turnstile is available with an optional trolley flap
- The turnstile has an emergency exit breakout facility as standard
- Left or Right 360 Degrees Operation
- Comes chrome plated finish as standard
- PVC top caps and cups available in Black or chrome
- Minimum 1350mm width required (without trolley flap)
- Trolley flaps available in 1000mm, 1500mm or 2000mm as standard

PathMinder Gate

The PathMinder Gate comes left or right handed and has an integrated and adjustable emergency break-out function. The gate will open through 90 degrees and will return to the closed position with an integrated spring mechanism. A mechanical gate with a long service life and reliable functionality, which can be combined and integrated with our other entrance and customer guidance systems.

Options

- Left Hand or Right Hand 90 Degrees Operation
- Key Lock to Inhibit Opening
- Solenoid Lock for Remote Override
