

EasyTouch Remote Control

Concept

The EasyTouch is a desk mounted tablet running our turnstile monitoring software which is designed to sit at reception and provide the reception team with remote control over the turnstiles functionality. Touch Screen functionality ensures easy of use and the software allows detailed control of each individual turnstiles operational modes.

Benefits

- An intuitive Graphical User Interface (GUI)
- Clear visual and aural cues to alarms and control inputs
- Emergency input mode via a virtual control button to open all lanes at once
- On-line alarm reporting
- Free standing or integrate into your desk top
- Control and unlimited number of lanes—scalable to the specific site layout
- Password Lockout when unattended
- Pin point control of each individual lanes function and modes

The EasyTouch can be used to set the following modes on a lane by lane basis:

Group Mode

Open a lane for a group of visitors or deliveries and then close it down again afterwards

Free Mode

The barrier is closed by entry is possible without a card, just walk in to the sensors an the barrier will open and then close again behind a person

Optical Mode

The barrier is held open but people still need to present a card to enter—if no card is presented then the lane will go in to alarm

Lock Down Mode

The lane is locked, even if a card is scanned the gate wont open, useful if you want to lock down certain lanes at certain times of day

The Centaman advantage...
