EASYGATE SG

DISCREET. FAST. EFFECTIVE

ABOUT EASYGATE SG

The EasyGate SG is a highly cost effective speedgate that combines glass barriers with optical detection technology to provide a fast throughput with high security.

The EasyGate SG's glass barriers swing inside the pedestal after a valid card is presented, giving the authorised user a clear lane to pass through. These barriers quickly close behind the authorised person to deter unauthorised entry or tailgating.

Safety is high on the agenda for this speedgate. Infrared beams monitor the length of the pedestal to ensure the lane is clear before the barrier attempts to close. If the barriers sense an obstruction, they will stop moving until the obstruction is moved.

The most cost-effective speedgate in the award winning EasyGate range, the EasyGate SG is easy-to-use and versatile to suit any application that requires style and affordability.

KEY FEATURES

- Cost effective
- Fast and easy to use
- Good for leisure/gym environments
- Proven track record
- Space-saving design

OPERATION

The barriers quickly close behind the authorised person, thereby deterring any unauthorised entry or tailgating.

EasyGate SG automatically sounds a local alarm if someone enters without authorisation additionally a relay can activate stricter security actions such as triggering CCTV, locking doors, or controlling elevators.

SAFETY

The EasyGate SG features 5 different settings that let you define the size of the safety zone. This allows the EasyGate to be tailored to suit your safety and security requirements.

The EasyGate integrates with fire alarm systems to automatically open in case of emergency. In power fail the gates can either be configured to open automatically or for the barriers to be released so they can be manually opened with minimal force.

Additionally a battery back up can be supplied to allow continued security in a power fail scenario.

DDA COMPLIANT

The EasyGate SG is also DDA compliant, meaning your site can effectively and safely cater to all visitors.

KEY BENEFITS

- **Fast acting barriers**
- **High-end aesthetics**
 - European architectural design
 - Durable, stainless steel pedestal
 - Same slim pedestal design for wheelchair lanes
- **Reliability**
 - MTBF of 3,000,000 operations
 - 24 month warranty
 - Manufactured in Europe to ISO9001
- **Advanced Technology**
 - Remote turnstile diagnostics
 - Bespoke PC monitoring solution
 - 5 Safety/security settings
- **Heightened security**
 - Fast acting barriers close behind authorised users to deter tailgating
 - IR sensors detect tailgating and unauthorised entry
- **User friendly**
 - No contact barriers provide easy passage, even with luggage
 - Fast-acting barriers open away from users
- **Versatility**
 - Ideal for use in leisure and aquatic centres, gyms and corporate offices.

ABOUT ENTRANCE CONTROL
