

# EASYGATE SPA

COST-SAVING. SMART. SECURE.

## ABOUT EASYGATE SPA

The EasyGate SPA is an innovative "Pay to Access" Speed Gate designed to restrict access to paying visitors. The SPA is an ideal solution for businesses that want to restrict certain areas without implementing a full ticketing system or employing staff to collect payments. The speedgate comes fitted with a coin / token validator as standard and includes options for credit card payment, bar coded vouchers or VIP RFID cards. Another key advantage of the SPA is its high level of security and combined wheelchair/ standard access.

## KEY FEATURES

- "Pay to access" system
- Coin, EFTPOS and RFID enabled
- Combined standard/ wheelchair access
- Barrier height up to 1400mm
- DDA compliant (EasyGate SPA Premium)

## OPERATION

The barriers work in a normally closed mode and quickly swing open away from the user once valid payment or voucher has been presented. The barriers quickly close behind the user, thereby deterring any unauthorised entry or tailgating. The EasyGate SPA features our state-of-the-art Magnet Drive Motor that provides faster and quieter operation. The glass barrier for the EasyGate SPA can be up to 1400mm tall to prevent climb over attempts and making it suitable for unmanned applications.

## SAFETY

Safety beams monitor the area near the barriers and are designed to prevent the barriers from closing/ opening on an obstruction. The EasyGate SPA has multiple safety and security settings that define the size of the safety zone in the gate's operation. This allows us to tailor its security level to suit your site. Additionally, the barriers feature a torque sensor so they can detect resistance when closing. When integrated with the fire alarm system and upon a fire alarm, the barriers automatically open to allow for free emergency egress. The barriers can also open in the same manner in the event of a power outage.

## RELIABLE

With a MTBF of 5,000,000 operations and industry leading 36 months warranty the EasyGate SPA is designed to provide years of trouble-free operation. In addition, the gate can be configured to allow remote diagnostics allowing engineers to dial in and undertake remote maintenance, servicing, configuration and troubleshooting saving on expensive site visits.

## ADD ON'S

The SPA is available with a range of optional add-ons depending on the application. These include a credit/debit card terminal enabling contactless payments, a RFID reader for VIP and staff access, a receipt printer and barcode reader.

## KEY BENEFITS

- **Fully automated system**
  - Fully Automated "Pay to Access" entry system, free exit passage
