Entrance Control

# NEXGATE

PREMIUM. SLEEK. SPACE-SAVING.

## ABOUT NEXGATE

NexGate is a premium, space-saving entrance control solution designed to divide office floors or other spaces securely while taking up the minimum of space. The model's elegant glass barrier panels retract smoothly into a slim cabinet to allow access, minimising the physical footprint required on either side of the passageway.
If desired, a radar detector can be activated to sense peoples' direction of approach and only permit one-way thoroughfare.

ASIAL MEMBER
AUSTRALIAN SECURITY INDUSTRY ASSOCIATION LIMITED

## KEY FEATURES

- High-quality prestige access control
- Compact sliding-panel design with no swing arc
- Climb-over detection upgrade option
- Customisable style options
- RFID reader compatibility
- DDA compliant

## EFFICIENT DIVISION OF SPACES

Traditional solutions like swing gates require clearance space to open, which can constrain positioning of access control and create a hazard. NexGate's self-contained retractable-barrier design allows it to be installed close to walls, partitions or open stairs connecting office floors without compromising clearance, while its 900mm lane width makes it DDA compliant.

## PREMIUM AESTHETICS

Modern, minimalist and beautifully engineered, with a streamlined pedestal footprint, the NexGate welcomes entrants in style. With customisable panel colours, branding and finishes in stainless steel and white or black powder coating available, NexGate's aesthetics can be fine-tuned to match corporate branding or interior design schemes.

The gate's sliding barrier panels are crafted from 8mm-thick toughened glass and can be upgraded with stylish integrated wing lights. Separate navigation lighting is also available to guide users smoothly through the gate.

## SMART RELIABLE DETECTION

NexGate is equipped with three infrared sensors to continuously monitor and track movement as people move through, while optional climb-over detection takes its capability to the next level.

## OPERATION

NexGate is designed for high-throughput scenarios and offers versatility to integrate with third-party access control systems and advanced recognition systems including RFID, mobile access and QR codes.

## RELIABLE

Quality construction and self-maintaining panel rails provide consistent, dependable performance – minimising the need for ongoing maintenance.

## KEY BENEFITS

- **Compact size**
  - Slim pedestal footprint with sliding panel operation
  - 900mm lane width, ideal for dividing office floors and open-plan spaces
  - Fits close to walls, partitions or open stairs without compromising clearance
- **Style**
  - 8mm toughened glass wings for a modern look
  - Customisable panel colours, finishes and branding available to complement desired corporate aesthetic
  - Optional LED navigation lighting and wing lights
- **Security and safety**
  - Three infrared sensors and one radar sensor ensure security and safety
  - Supercapacitor-powered emergency opening
  - Optional anti-climb detection
- **Reliability**
  - Designed for continuous, high throughput operation
- **Applications**
  - Dividing office floors and open-plan spaces
  - Securing internal checkpoints, tops or bottoms of stairs and lift lobbies
